Artist's statement

I was raised in South Western Australia's Great Southern coastal forest region, where my connection to nature and the etheric began. As an artist, therapist, and healer, I find immense inspiration in the natural world and the essence of femininity.

My life's journey has taken me across different countries and cultures, deepening my appreciation for the harmony between humans and the environment. I see the world as a magical tapestry of colors, textures, and energies, where every moment holds a story waiting to be told through art.

From a young age, I've had the gift of clairvoyance, seeing vivid colors and auras that influence my artistic vision. Each stroke of my acrylic paint captures not just landscapes but emotions, healing energies, and the beauty of nature's tranquility.

My art is a bridge between the seen and unseen worlds, inviting viewers to experience the healing energies and inspirations that flow through me. It's a journey of emotions and connections that transcend words, resonating with the depths of human experience.
